

Cubus Tandem Bed

In just a few simple steps, the Cubus Tandem bed transforms from a single bed into a spacious double bed and is ideal for the youth or guest room. It pampers overnight guests with a high level of comfort and can be opened up into a generous lying area as necessary. After use, the second bed disappears back under the first one. The cubus tandem bed is available in the wood types alder, beech, beech heartwood, oak and white oak, thus offering a wide range of design and combination options with the TEAM 7 element and wardrobe system.
