

Cubus Sideboard

If it brings good luck when you knock on wood, our Cubus occasional furniture with its 25 mm-thick top board and side panels of beautiful solid wood is a really sound piece of luck. In contrast, it would indeed be bad luck if you could not find the right piece for your dining room among the many different versions of our cubus occasional furniture. One such piece is our cubus shelf system, which can also be arranged into versatile sideboards and highboards, exactly as you please. Hinged doors, sliding doors, drawers and flaps with shelf bases in wood or glass enable a lot of creative freedom in the design.
