

Enna Chaise Lounge

Designer Hanne Willmann has been working as a freelance designer since 2015. That same year she was proclaimed Design Talent of the Year and has since been making international fame. Her greatest strength: clarity, modesty and sincere design. These keywords describe the Enna model; a contemporary modular system that Hanne Willmann designed for Leolux.

The collection includes an armchair, love seat, sofas, divans and a wide range of elements. Matching headrests are also available.

The aluminum legs are always finished in powder coated E2200 Nuit but other colors are available on request.

Besides the "Bent" arm cushion, there's also a "Straight" arm with a traditional design.
