

# Baani Chair

With his clear designs, this Brussels-based product designer has built an impressive track record with an international client base. Leolux is adding to this with the versatile Baani design.

The Baani chair effortlessly combines an elegant look with attractive upholstery details. A pleated strip across the centre of the seat back provides a rich contrast, giving Baani a soft touch. The chair also offers several other options to make each set unique. The upholstery combination is extremely defining, but you can also opt for versions with or without arms and for wooden legs or an aluminium swivel base.

Clear graphic lines form the basis of Willenz's sophisticated furniture designs. Simple and powerful, as he demonstrates with Baani.

Dining chair, with or without arms. Base, Twist (with wheels) or Cruz swivel base (without wheels) in polished aluminum or in a powder coated color. The version with wooden legs are finished with a stain color of your choice.
