

Lux Orbis Table Lamp

Waves and particles: that is the miracle of light. An elusive fluid carried by a cavalry of photons. This beautiful story is told by Lux Orbis. The light is borne by an earthcolour base and crowned by a disk as dark as the universe. A cordless lamp with HISLE technology, a real lantern for modern times, created in collaboration with Stéphane Parmentier for Créations Dragonfly.
17

Rechargeable lamp with tactile switch.
