

# DS-800 / 91

## Side Table

Craftsmanship meets design

Created as an open inviting hand, the redesign of DS-800 by Ubald Klug is a timelessly beautiful retro classic with a sculptural appearance that invites to inspiration and creativity. With its hidden function of a 360° rotating seat, DS-800 brings momentum to every sitting position while at the same time more than doing justice to its role as an extraordinarily comfortable armchair. Whether as a single-seater or as an endlessly combinable seating group, DS-800 can be smoothly integrated into the room. In addition to the armchair, stool and table elements are available as well and can be integrated into the seating groups.
