

DS-291

armchair

DS-291 by de Sede Design Team

Chameleon with a character of its own. Without making the slightest attempt to steal the show, the graceful DS-291 easy chair immediately catches the eye and holds the interest of everyone who sees it. Despite its compact volume, it provides all the expected level of inimitable de Sede comfort. The intriguing contrast between the clean trim lines of its rounded backrest and the deliciously yielding interior upholstery is given both visual and tactile emphasis by the exquisite combination of full grain and pliant nappa leathers. In addition to the wealth of intricate stitching and light airy look, it is the subtle marriage of spare lines and soft volumes that make this chair so easy to combine with other furniture. Like a stylish chameleon, the DS-291 can be seamlessly integrated into every living environment without ever dominating its surroundings.
