

Alpha wall sconce

The designers Ramos & Bassols have created the Alpha lamps collection for Vibia. The Alpha collection is a grouping of small scale wall lights, characterized by their refined silhouette. The Alpha lamp collection include wall lamps and reading wall lamps.

Vibia manufactures the Alpha lamp in several finishes: lacquered white or lacquered black with either satin, nickel, or chrome. All of the different components of the Alpha lamp collection are fitted with LED lights. The Alpha wall light is surface mounted and easily maintained, therefore suitable for both residential and contract projects.

Wall lamps with on/off switch, available in matte white lacquer and chrome, matte black lacquer and chrome, matte graphite lacquer and black, and matte white lacquer. Its methacrylate diffuser gives a warm, very cozy light. Alpha follows' the reader's movements as it rotates and can be angled, opening up to 75° and turning through 360°, which also enables it to provide indirect lighting.
