

FM-441 Velas sofa

The Velas concept is unique. The flat sofa that can change its shape really offers you all the options for sitting, relaxing and sleeping. The versatile adjustable arm and back cushions and the seat cushions are separate from each other. For this reason, seat movements have no impact on the arm and back cushions. They can therefore be used as surfaces to place things on. The extractable seating surface even offers unrestricted comfortable for two persons. Velas is available as a sofa, a recamiere and as a modular system with corner units.
