

# DS-7 Sofa

This latest creation for de Sede by Italian designer Antonella Scarpitta is based on a lounge concept. She has designed a cubic sofa that is strictly reduced to the essentials. This transforms her new model into a timeless object for practical use as well as for decoration. Elegant lines, unparalleled seating comfort and a modular concept that makes for a wealth of potential applications are further attractive features of this outstanding sofa. In addition to its clean-cut form, this design also appeals thanks to its interesting, concealed function: the low rear-sections that are so typical for lounging can be folded upwards if required to provide comfortable back support - for instance, for reading. This unmistakable programme consists of three different sofas, five stools and four supplementary units which make it possible to create a wealth of different combinations - such as corner groups.
